

Hand-Crafted Scope Mounts Since 1964
www.conetrol.com

RINGS

HUNTUR

Satin-finished streamlined steel. Will not reflect game-spooking light. Fits any Conetrol base. Recommended for "permanent" mounting.

GUNNUR

Mirror-finished streamlined steel. Fits any Conetrol base. Similar to Conetrol's Custom rings, but without ring-stud screws, which are unnecessary if scope is to be "permanently" mounted

LIMITED

Satin-finished steel. Fits any Conetrol base. Stainless steel ring-stud screws keep each ring anchored around the scope when the scope is off the base.

CUSTOM

Mirror-finished streamlined steel. Fits any Conetrol base. Stainless steel ring-stud screws keep each ring anchored around the scope when the scope is removed from the base.

Conetrol blued rings are available in 1", 26mm, 26.5mm, 30mm, 34mm, and 35mm sizes in multiple heights.

STAINLESS STEEL

Conetrol 1", 30mm, 34mm, and 35mm rings are also available in satin-finished stainless steel.

BASES

HUNTUR

Finest quality, satin-finished steel. The equivalent of other quality mounts now on the market. Angular edges, regular blued cone screws. Will fit factory drillings on all guns.

GUNNUR

Like Huntur, but with a glossy finish. Angular edges, premium stainless steel cone screws. Will fit factory drillings on all guns.

LIMITED

Satin-finished steel, with contoured (rounded) corners for an upscale appearance. Blued cone screws. Will fit factory drillings on all guns.

CUSTOM

Beautiful dark-glistening streamlined steel. All edges contoured. The best finish on the market! Premium stainless steel cone screws. Will fit factory drillings on all guns.

FLUTED BASES

(Blued or stainless steel)

STAINLESS STEEL

(For many popular guns)

Conetrol also offers a large inventory of DapTar bases, designed to fit receiver dovetails or various other mounting mechanisms without drilling or tapping.

Hand-Crafted Scope Mounts Since 1964

OUR LOGO

You might be interested in the story behind our new logo. The elk silhouetted is not just any elk — it's a prized trophy hanging in the home of one of our family members. Sadly, Grandpa is now gone, but he was more than eager to tell his elk story to anyone who'd listen. The deer next to the elk is a reminder of a particularly memorable hunting experience had by two other family members. In a fateful wrong decision, the father and son opted to hike the wrong ridge in Colorado, discovering only later through binoculars a trophy bull and buck grazing peacefully together on the adjacent ridge. This story of the "ones that got away" has since been told, retold, argued, and embellished many times around the campfire, much to the delight of the other family members who weren't actually there! Finally, the star is for Texas, where Conetrol products have been made since 1964.
